

# ENVIRONMENTAL POLICY

Our mission is to minimize the impact of our activities on the environment and maintaining this by working in accordance with the environmental standards and to comply with legal requirements and regulations applicable to our field of expertise.

We believe that the key to success in this regard is our management system - which is based on the international standard - ISO14001: 2015. Our system ensures that effective controls are consistently applied to our work processes and environmental performance, and provides an overview of our environment-related activities.

We maintain this system and ensure its continuous improvement. All employees and suppliers are expected to share this commitment. The environment is key within our organization. All suggestions that can help us to achieve our targets are more then welcome. This policy and our Integrated Management System (IMS) will be reviewed regularly by senior management to ensure continuous effectiveness and improvement.

This is characterized because we:

- respect and comply with relevant (environmental) laws and regulations;
- prevent damage to or unnecessary burden on the environment;
- purchase sustainable electricity and forest compensated gas;
- limit the use of chemicals to a minimum;
- deal responsibly with paper and paper waste (recycling);
